

## What is the aim of Gen-Equip?

To provide online genetics education to health professionals.

## How is the education provided?

A set of online modules, webinars and tools for daily clinical practice. The educational modules have been assessed and accredited for CPD by the European Specialist Nurses Organisation and the Royal College of General Practitioners.

Available in English, Czech, Dutch, Icelandic, Italian and Portuguese via [www.primarycaregenetics.org](http://www.primarycaregenetics.org)

## The Modules

Each module is based on a patient interaction.

The modules cover:

- Familial breast and ovarian cancer
- Inherited colon cancer
- Inherited cardiac conditions
- Familial hypercholesterolaemia
- The child with developmental delay
- Care of women before and during pregnancy issues (4 modules)

The education programme is highly interactive, with videos and questions throughout each module. Pre and post-module quizzes are included and those who complete successfully are issued with a certificate of completion.

Learners can do one, several or all of the modules to update their knowledge and obtain recognition to demonstrate they have undertaken CPD.

## Who can access the course?

Any health professional who wishes to improve their knowledge and skills can access the modules, free of charge, via: [www.primarycaregenetics.org](http://www.primarycaregenetics.org)
